

Executive IAM Risk Summary

Overall Risk Rating

Critical

Findings Overview

- Total Findings: 4
- Critical Findings: 1
- High Findings: 1
- Medium Findings: 2
- Low Findings: 0

Key Business Risks

This access review identified identity and access management risks that may expose the organization to unauthorized access, audit findings, compliance gaps, and potential misuse of sensitive systems.

Priority Actions

1. Immediately remediate Critical findings.
2. Review and approve or remove High-risk privileged access.
3. Validate dormant accounts and disable access that is no longer required.
4. Strengthen Joiner-Mover-Leaver controls.
5. Establish recurring access certification reviews.

Compliance Impact

These findings may impact control expectations under NIST 800-53, PCI-DSS, SOC 2, HIPAA, and general IAM governance standards.

Executive Recommendation

Leadership should treat this as a priority IAM governance issue and assign ownership for remediation, evidence collection, and recurring access review monitoring.
